SISTEMA ZERO / *SYSTEM ZERO*

Bencore presenta un sistema di parete modulare completo di porta, pensato sia per spazi domestici (partizioni interne, cabine armadio) che professionali (negozi, uffici, stand, alberghi ecc.), che reinterpreta la luce come elemento fondamentale degli interni contemporanei.

Questo sistema impiega un profilo in alluminio disponibile in una vasta gamma di colori RAL da abbinare alla collezione di pannelli Bencore (Starlight, Lightben, Hexaben, Ecoben). La struttura metallica è facilmente adattabile alle esigenze dimensionali degli spazi da dividere garantendo ampia libertà progettuale e semplicità di installazione.

Il sistema Bencore consente di adattarsi alle esigenze più disparate.

Acquistabile anche come singolo modulo, la parete e la porta ad anta battente possono essere forniti ad altezze variabili da 2,10 mt fino a 3 mt in un unico pannello senza giunzioni o sopra luce per la porta.

Facile da installare, il sistema Bencore può essere inserito in una parete preesistente di altro materiale (muratura, legno o cartongesso), o per realizzare una parete da pavimento a soffitto fino ad un'altezza di 3 mt.

Bencore presents a Modular System of walls and doors designed for domestic and professional spaces, reinterpreting light as the main element in contemporary interiors.

The System uses an aluminum profile available in a wide range of RAL colours to match Bencore product Collection (Starlight, Lightben, Hexaben, Ecoben). The metal structure can easily fit any dimensional need, allowing design freedom in definition of spaces together with easy installation.

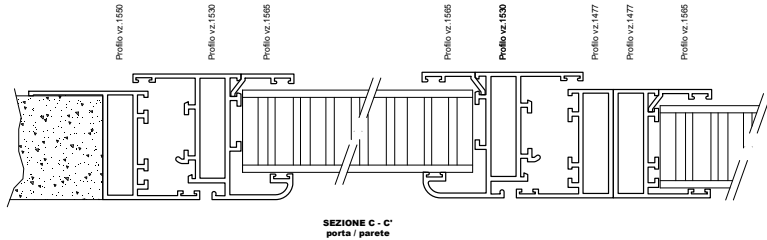

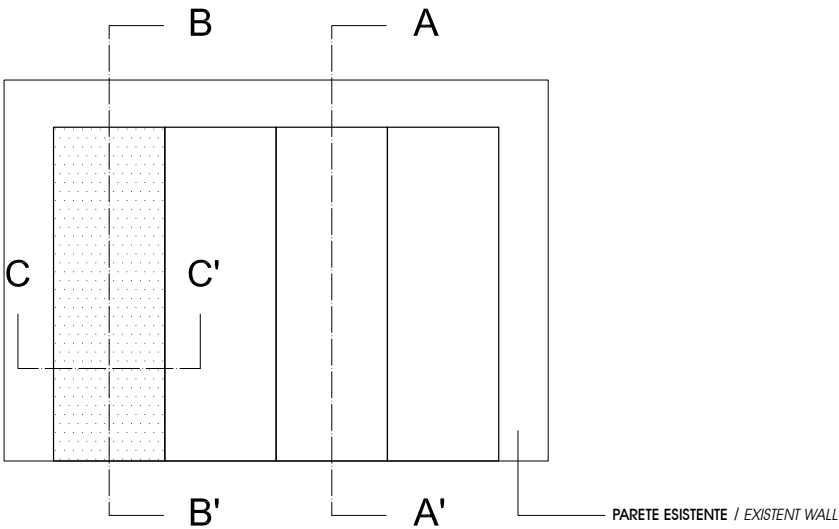

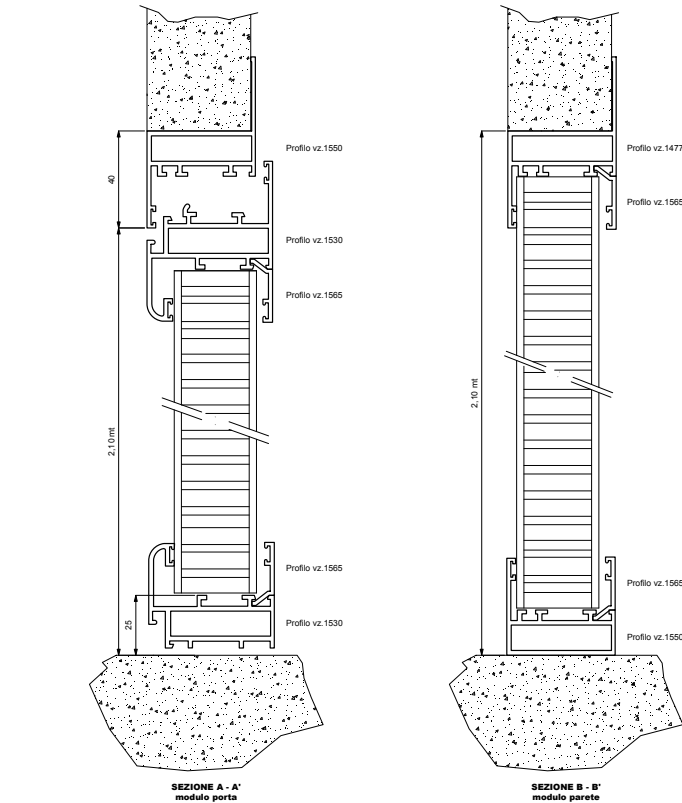

Bencore System is extremely versatile and offers the possibility to personalize interiors in a wide range of configurations: from single-module wall, to multiple-modules wall with or without the door, available from 2,10 up to 3 meters heights. Easy to install, Bencore System can fit any existing wall (masonry, wood, plasterboard) and can be used for a floor-to-ceiling wall up to a 3 mt height.
